

# Paediatric Injectable Guidelines 5th Edition

## New to the Paediatric Injectable Guidelines 5th Edition:

- A comprehensive set of fully updated monographs plus 26 NEW monographs including some S.A.S drugs.
- Plasma-Lyte 148 compatibility for over 70 intravenous therapeutic drugs.
- Tallman lettering for easier identification.
- Refined Parenteral Nutrition (PN) tables with included concentration caveats.
- Improved IV fluid compatibility with included concentration caveats.

MedicalDirector Publishing and Knowledge, in association with **The Royal Children's Hospital Melbourne (RCH)**, presents the newly updated **Paediatric Injectable Guidelines 5th Edition**.

This resource provides paediatric specific information for improved safety and outcomes for young patients. The clinical content has been optimised for web browser access and contains search/browse functionalities using active ingredient or trade name.

### Additional features and functionality include:

- Information about reconstitution and administration of drugs as an IV injection or infusion.
- Other methods of administration for parenteral use.
- Vial and ampoule labelling, use and storage recommendations.
- RCH parenteral nutrition and fat emulsion compatibility and incompatibility information.
- Intravenous fluid additive calculations.
- Infusion solution composition details.
