MedicalDirector Clinical/PracSoft 3.16c Release Notes

The following information outlines the enhancements, modifications and fixes contained in MedicalDirector Clinical/PracSoft **3.16c**, released 2016.

This information is also available for download as a PDF file from the MedicalDirector Knowledge Base at <http://www.medicaldirector.com/kb>.

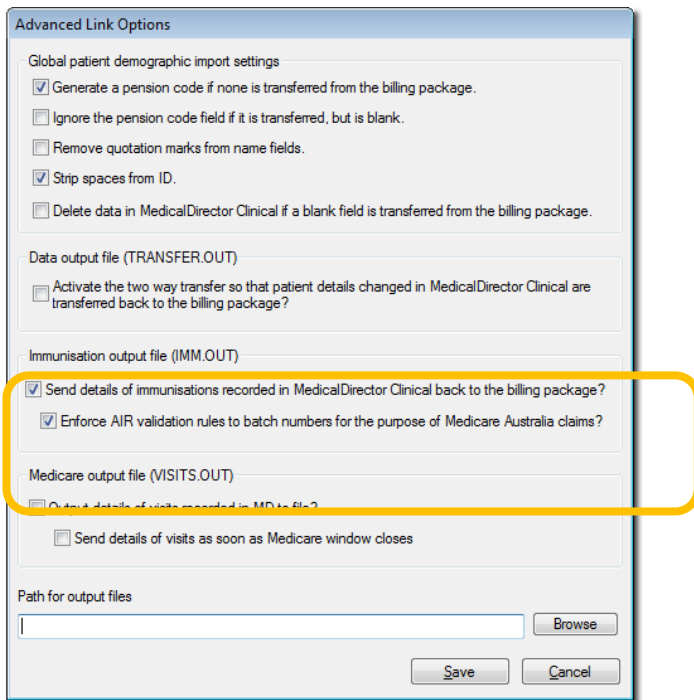

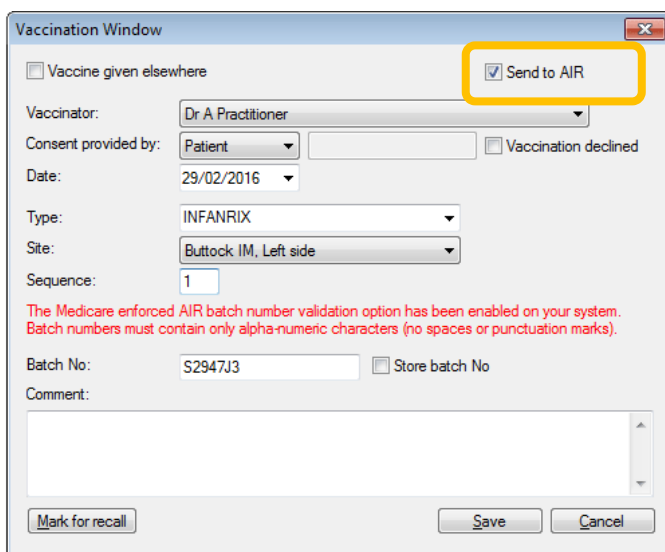

Content for MedicalDirector Clinical 3.16c

Immunisations

- All references to 'Australian Childhood Immunisation Register (ACIR)' have been changed to read 'Australian Immunisation Register (AIR)'.
- Department of Human Services now requires that all States and Territories transmit vaccination data to Australian Immunisation Register (AIR). MedicalDirector recommends you install the October 2016 MDref in order to take advantage of these changes.
 - Any AIR-recognised vaccine that has been administered (at the surgery) to a patient (regardless of age) will be transmittable to AIR, via PracSoft or the Imm.out file.
 - Advanced Link Options has been modified accordingly, by removing the redundant option to send 'Whole of Life' data (previously applicable only to Queensland practices).

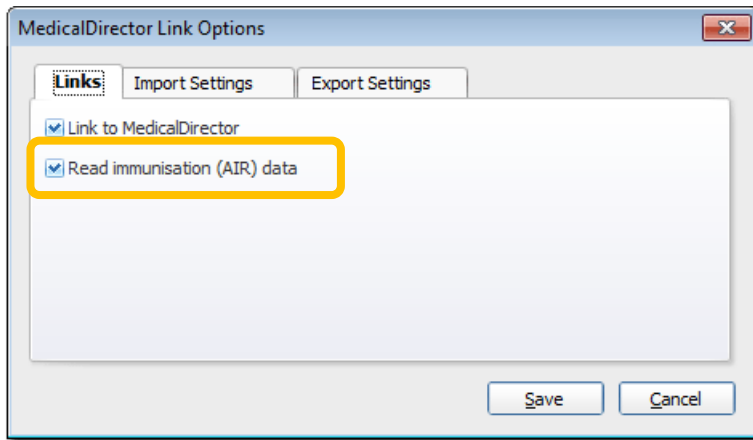

- Vaccination Window modified (reference to AIR)

Content for MedicalDirector PracSoft 3.16c

- All references to 'Australian Childhood Immunisation Register (ACIR)' have been changed to read 'Australian Immunisation Register (AIR)'.
 - MedicalDirector Link Options window modified;
