

# MD Insights

## Release Notes for Version 1.9.5

The following table describes the changes that have been implemented in MedicalDirector Insights Version 1.9.5.

### **Aboriginal Health Program National Key Performance Indicator changes (nKPI)**

#### **Specification changes:**

| nKPI indicator | Summary of changes                                                                                                        |
|----------------|---------------------------------------------------------------------------------------------------------------------------|
| PI11           | Change made to only include births meeting the minimum birthweight or gestational age as included in the indicator count. |
| PI13           | Change made to only include births meeting the minimum birthweight or gestational age as included in the indicator count. |

#### **Other changes:**

| nKPI indicator | Summary of changes                                                                                                  |
|----------------|---------------------------------------------------------------------------------------------------------------------|
| PI05, PI06     | 'Diabetes' removed from being classified as T2DM.                                                                   |
| PI14           | Reviewed and updated Influenza vaccine list to include a more complete list of current and historical vaccinations. |

#### **Other non nKPI changes:**

| Feature                      | Summary of changes                                                                                                                                                                                                         |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OSR Indicator Summary report | Introduction of function into MDInsights that generates an indicator summary file for OSR reports. It consolidates counts for all indicators into a single worksheet to improve the efficiency and accuracy of validation. |

<sup>a</sup> As per Specifications for nKPI and OSR, Version 20.0 [Specifications for nKPI and OSR — Solving Health](#)
